Summary

I am a final-year Information Technology student with a strong focus on Artificial Intelligence. I am passionate about developing intelligent systems and have built a solid foundation in Machine Learning and Deep Learning through both academic study and hands-on projects.
I have actively participated in AI-related competitions, including the AI Olympic, where I enhanced my problem-solving skills, teamwork, and ability to apply theoretical knowledge to real-world challenges. These experiences have strengthened my technical mindset and adaptability in fast-paced environments.
In the short term, I am seeking an AI Internship to gain practical experience, contribute to real-world projects, and further refine my skills in model development and deployment.
In the long term, I aim to become a highly skilled AI Engineer capable of building impactful and scalable solutions that solve meaningful problems in society.

Education

Bachelor of Science in Information Technology *Sep 2023 – Expected 2027*
Van Lang University, Vietnam

- Specialization: Artificial Intelligence
- Current GPA: 3.2/4.0

Projects

Fruit Detection and Processing in Natural Environments using YOLO *GitHub* *2025*

- Developed a computer vision system for fruit detection and classification.
- Trained YOLO model for real-time object detection (mAP: 0.85).
- Applied image processing techniques to improve performance.
- Built a demo application for prediction.
- **Tech:** YOLOv11, OpenCV, Python

Fine-tuning Qwen for Bilingual Translation and Summarization *GitHub* *2026*

- Fine-tuned Qwen model for English–Vietnamese translation and summarization tasks.
- Built and processed bilingual dataset (100,000 samples).
- Evaluated performance using BLEU and ROUGE metrics.
- Evaluated model performance using multiple metrics.
- **Tech:** Transformers, PyTorch

Text Classification using LDA and TF-IDF *GitHub* *2026*

- Applied LDA and TF-IDF for text classification.
- Performed preprocessing and feature extraction.
- Evaluated model performance (Accuracy: 0.90, F1-score: 0.88).
- **Tech:** Scikit-learn, Python

Skills

Programming: Python (Advanced)
AI/ML: PyTorch, Scikit-learn, OpenCV, Transformers (Hugging Face)
Specializations: Computer Vision (YOLO), NLP (LLMs, Translation, Summarization)
Data Processing: NumPy, Pandas, Matplotlib
Deep Learning: CNN, RNN, Transfer Learning, Fine-tuning LLMs
Tools: Git, Jupyter Notebook

Competitions & Certifications

AI Olympic Competition – Southern Region *2025*

- Participated in AI Olympic competition, solving real-world AI problems under time constraints.
- Applied Machine Learning and Deep Learning techniques.
- Worked collaboratively in a team under time constraints.

AI Application in Programming *2024*

- Completed training in practical AI applications in programming.
- Applied AI techniques to solve real-world problems.

Teaching Assistant Certification *2024*

- Supported instructors in teaching and assisting students.
- Developed communication, mentoring, and problem-solving skills.
