Summary

I am a third-year **Information Technology** student at **Van Lang University**, specializing in **Artificial Intelligence**. I have a strong foundation in **Machine Learning**, **Computer Vision**, and **Natural Language Processing**, with hands-on experience in projects such as **fine-tuning LLMs** and **training YOLO models**. I was awarded **3rd Prize in the Southern Region AI Olympic**, demonstrating strong problem-solving skills under pressure. I am currently seeking an **AI Internship** to apply my technical skills and contribute to real-world intelligent systems.

Education

Bachelor of Science in Information Technology <i>Van Lang University, Vietnam</i> · Specialization: Artificial Intelligence · Current GPA: 3.2/4.0	<i>Sep 2023 – Expected 2027</i>
--	---------------------------------

Projects

Skin Cancer Classification System using YOLO26 GitHub · Role: Model Training & Evaluation. · Objective: Early detection and classification of BCC and Melanoma skin cancer. · Methods: Fine-tuned YOLO26X on 36,000+ images; applied CLAHE for image enhancement. · Outcomes: Achieved 93% Top-1 Accuracy; deployed via Streamlit. · Tech: YOLO26X, PyTorch, OpenCV, Streamlit.	<i>01/2026 – 03/2026</i>
Fine-tuning Qwen for Bilingual Translation and Summarization GitHub · Role: LLM Fine-tuning & Backend Development. · Objective: Build a bilingual AI assistant for English–Vietnamese translation and text summarization. · Methods: Fine-tuned Qwen2.5 using LoRA on 100k+ samples; integrated Tesseract OCR and BLIP for multimodal processing. · Outcomes: Developed a Flask-based chatbot providing natural translations and concise 3-sentence summaries. · Tech: Qwen2.5, LoRA, BLIP, Tesseract OCR, PyTorch, Flask.	<i>01/2026 – 03/2026</i>
Text Classification using LDA and TF-IDF GitHub · Role: NLP Model Implementation. · Objective: Categorize unstructured text into thematic topics automatically. · Methods: Applied TF-IDF for feature extraction and LDA for topic discovery. · Outcomes: Achieved 0.90 Accuracy in document organization and retrieval. · Tech: Scikit-learn, NLTK, Python, Pandas.	<i>01/2026 – 03/2026</i>
Medical Readmission Prediction System GitHub · Role: UI Development & API Integration. · Objective: Predict hospital readmission risks and provide natural explanations. · Methods: Built a Flask frontend; integrated Gemini API to explain Random Forest results. · Outcomes: Developed a dashboard for rapid patient record lookup and risk assessment. · Tech: Flask, Gemini API, Scikit-learn, Pandas.	<i>10/2025 – 12/2025</i>
Fruit Detection in Natural Environments using YOLO GitHub · Role: Data Preparation & Pre-processing. · Objective: Real-time detection and nutritional lookup for 13 types of fruits. · Methods: Collected and labeled datasets for YOLOv11; used OpenCV for image processing. · Outcomes: Reached 0.85 mAP; implemented a web UI for tracking. · Tech: YOLOv11, OpenCV, Python, Flask.	<i>06/2025 – 09/2025</i>

Skills

Programming: Python

AI/ML: PyTorch, Scikit-learn, OpenCV, Transformers (Hugging Face)

Specializations: Computer Vision (YOLO), NLP (LLMs, Translation, Summarization)

Data Processing: NumPy, Pandas, Matplotlib

Deep Learning: CNN, RNN, Transfer Learning, Fine-tuning LLMs

Tools: Git, Jupyter Notebook

Competitions & Certifications

- **3rd Prize – AI Olympic Competition (Southern Region)** (2025)
- **AI Application in Programming Certification** (2024)
- **Teaching Assistant Certification** (2024)
